What's Happening? Not Much!

At least on my part in regard to RC. In the past month my porch thermometer has indicated as low as 8 degrees and as high as 60. Unfortunately, only once the 60. An excursion into the tall grass with my *Enigma* (what I call the electrified Piedmont Sport) led to a messy mulching of the gear mount that has yet to be repaired. I think I put a curse on the airplane with the name *Enigma*. It means "puzzle" in Latin.

I expect some of the more hardy types have been out in the cold and windy conditions but the time for me to play that game has passed. I seldom head to the field when it gets worse than 50 degrees and light wind. I find myself now being critical of the amount of light as well.

It is a good time for reading and planning. Prices and selection are getting more favorable all the time.

The 20th Annual Swap Shop was a great success with much praise from vendors and buyers...
