The flying season is here!

Of course, the wind is usually fierce, but you cannot have everything... Now that we are ready to buy fresh parts and supplies, the hobby shops and the online suppliers have most everything on back-order.. Or at least it seems that way. According to the wife, I failed to properly plan again this year.

I am still working on getting the Heli (TREX 450) back together. It won't be much longer and I am learning way more than I had planned on about the mechanics involved.

—Until later, John Ferrell

"If the wings are traveling faster than the fuselage, it's probably a helicopter -- and therefore, unsafe."

"Weather forecasts are horoscopes with numbers."

"Mankind has a perfect record in aviation; we never left one up there!"

"If something hasn't broken on your helicopter, it's about to."
